Q1	**NVR 8-Channel:** 1. Please confirm if adjusting the video input to 8 channels instead of the listed 16 channels is acceptable. 2. There is a discrepancy between the NVR specifications (support for "up to 8TB capacity per disk" for both 8- and 16-channel NVRs) and the BoQ, which specifies 8 HDDs with 4TB each and 1 HDD with 8TB capacity. Could you confirm the correct HDD allocation across each NVR model?
A1	1. Accepted 2. There is no discrepancy, consider BoQ list to provide the current requirement. The specs "up to 8TB "is for future needs means that the NVR can handle also the 8 TB HDD."
Q2	**NVR 16-Channel:** Please confirm if the HDD requirements for this model align with the listed "up to 8TB capacity per disk" in the specifications, given the BoQ's specified HDD capacities.
A2	Consider BoQ list to provide the current HDD requirements.
Q3	**NVR 32-Channel:** 1. Please confirm if it is acceptable to use switches to provide power to the cameras rather than relying on the NVR's PoE function, though the NVR supports up to 24 PoE ports if needed. 2. Additionally, could you confirm the correct HDD allocation for the 32-channel NVR, as the specifications indicate support for "up to 16TB capacity per disk," while the BoQ lists only 4TB and 8TB HDD options?
A3	1- Both options are Accepted 2- Consider BoQ list to provide the current HDD requirements.
Q4	**Project Duration Extension Request:** The RFP specifies a project duration of 90 calendar days from the commencement date. To allow for any potential delays if materials are not in stock at the time of awarding, could you confirm whether an extension of this timeline would be acceptable.
A4	Accepted for 120 days.

Q5	In the cameras specs it is mentioned that the camera box should be with same brand of camera, what does that mean, could you please share picture of the box you are talking about?
A5	This means the metal structure back box that the camera will mounted to. Ex.
Q6	For the ANPR camera: do you need it to recognize other information rather the Plate Number? Do you need these recognized info sent to NVR or should the camera handle itself?
A6	• Only plate number. • To NVR.
Q7	In the specs of 8-ch NVR with POE, it is mentioned 16 Channel, please confirm if this is a typo mistake.
A7	By mistake
